

BAUMCert

DATASECURITY

You enter the BAUMCert with the following
Internet address (URL)
<http://www.baumcert.com>

Availability

The BAUMCert is available 365 days a year, 24 hours a day (with the exception of the downtimes of our ISP www.kamp.de which are usually scheduled off the job).

Your user name and password are valid without any time-limit. We ask you to inform us when an employee is leaving your company thus we are able to cancel the account to avoid abuse of the service.

Data security and storage

All the certificates are backed up to streamer tapes daily outside our building, so that we can assure the availability for ten years. Hence we fulfil the rules of the TÜV Süddeutschland within the framework of our Quality Management.

This combination of data backup ensures almost permanent data availability and security. In the rare event of missing certificates we can re-order the documents from our suppliers.

The summary sheets with the steel and lining batch numbers are also saved to streamer tapes daily. If this sheet should not reach you we are able to send you the information by e-Mail swiftly.

The TÜV has tested our BAUMCert and agreed with the type of archiving of the material certificates.
